

### PGA-Extractor

Hand tool to remove PGA's.  
For all component sizes from 10x10 to 25x25 with and without heat-sink.

#### Simple

Without any prior adjustment, PGA components can be carefully extracted from their mountings. The settings for size and extraction are carried out in one process.

#### Safe

During extraction, the claws press firmly onto the edges of the component. Any possible damage caused by the component slipping out is thereby prevented.

Surface resistance is  $10^5 \Omega$ .

Description	Part No.
PGA-Extractor 1	8980101

with 4 claws  
and 4 support arms

Clearance required:  
4 sides, 4 mm.
