

Mark II Reversible Pad and Kit

The Mark II pad, our **most popular model**, is primarily used with thin, alcohol based inks. The Mark II pad has a unique two-sided system that allows the operator to flip the pad over when the first side begins to dry out. As one side of the pad is in use, the other

side is automatically being rejuvenated through condensation and capillary action. The Mark II pad is ready to use when you are.

The Mark II stamp pad has a special inking surface that minimizes resin buildup. By eliminating the gradual buildup of resins, typically found in stone pads, the Mark II pad will allow you to make consistent, high quality marks. This design, enclosed in an airtight container, allows the Mark II pad to enjoy the longest life possible.

Inks available for the Mark II Pad:

[1250](#): 10 to 15 second dry time

[214](#): 40 to 60 second dry time

[141](#): 2 to 4 minute dry time

6459: 40 to 60 second dry time (black & white only)

Colors Available: Black, Blue, Red, Green, Purple, White, Yellow and Orange
