

Alumtec Extrusion profiles

Range of high strength extrusions for a variety of Alumtec applications.

The following types are available:

1. Twin web extrusion (90 degrees).
 2. Single web extrusion.
 3. Twin web extrusion
 4. Twin web extrusion (180 degrees).
 5. Square extrusion (no web)
- (Refer to large image for examples)

All profiles are extruded from structural type aluminum for maximum strength and rigidity. All extrusions are 25mm sq. (excluding web) and have a wall thickness of 3mm for maximum strength.
