

Information for Product: **Static Dissipative Acrylic Floor Finish**

Designed to provide high performance static control on any sealed or hard surface in manufacturing production areas, Staticide Acrylic Floor Finish is a high solids, low cost solution to protect sensitive manufacturing areas from the dangers of static build up.

Additional information available below.

Staticide® Acrylic. The latest in ESD static dissipative floor finishes.

Static can threaten your productivity. This is true whether you're responsible for high tech areas such as ESD sensitive production and assembly lines, computer rooms, hospital operating rooms and clean rooms, or high-traffic areas such as receiving, shipping and reception rooms.

Staticide Acrylic is the protection you need.

Cutting-edge technology assures Staticide® Acrylic's superior performance on any sealed or hard floor surface, including sealed concrete, marble, wood, terrazzo, solid vinyl, vinyl asbestos and asphalt tile.

Staticide® Acrylic offers these remarkable properties:

- Low volatile organic compound (VOC) content
- High resistance to abrasion
- Durable, non-slip formulation
- Controls static generation even at low humidities
- Resists powdering and discoloration
- Zero formaldehyde
- Versatile, self-leveling application

Staticide® Acrylic can be easily cleaned without loss of finish with our [Restorer Cleaner](#).

Staticide® Acrylic is available in your choice of:

- 3.8 Litres bottle
- 18.9 Litre pail
- 204.4 Litre drum
